

### *Alistipes shahii* (OTU 16)

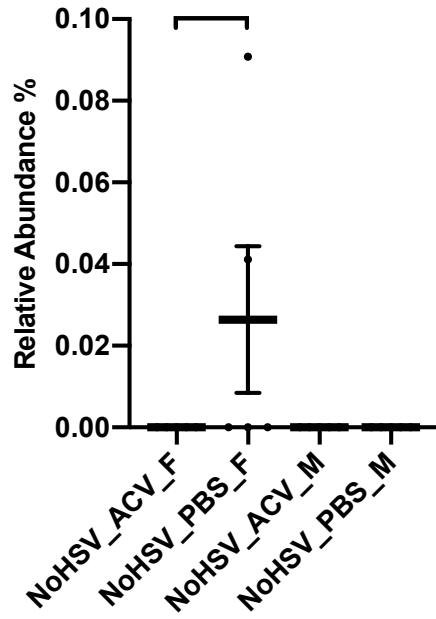

### *Alistipes* spp. (OTU 48)

### *Porphyromonadaceae* (OTU 77)

### *Lachnospiraceae* (OTU 82)

**Supplemental Figure 1. Fecal Bacteria from Uninfected Mice Treated and Not Treated with ACV.** For each taxa, edgeR analyses determined that the only pairwise difference was between ACV treated and untreated uninfected female mice (FDR-adjusted P values < 0.05). Bars = standard error. Females = '\_F' and Males = '\_M'.
